

SCHEDULE A

PART XII - Whole Farm Potato Plan

This Schedule A, Whole Farm Potato Plan, forms an integral part of the PRODUCTION INSURANCE AGREEMENT and as such contain supplementary information specific to potatoes.

1. The purpose of this plan is to provide an option to select full yield offset between ALL varieties and potato crop groups insured and for the insured to receive a reduction in premium costs for this combined whole farm coverage. The premium rate discount will depending on the insured value of the mix of crops grown and is determined from the Table included, herein.

For the Whole Farm Plan :

- (a) the total production guarantee equals the sum of all the individual crop guarantees for each crop group;
- (b) the premium discount is determined based on the mix of crops offered for insurance and is determined from the table included, herein;
Where:- % probable yield of major or dominant crop group is plotted on the side axis of the table
- % probable yield of secondary crop group is plotted on the top axis of the table.
- (c) the percent reduction in the base premium rate is based on the proportional production of the dominant and secondary crop groups insured under the program and plotted on the table.
- (d) the indemnity is payable only if total production for all varieties or crop groups is less than the total production guarantee for all varieties or crop groups, as stated on the Statement of Account.

- 2. The plan is restricted to insured clients growing two or more of the varieties or crop groups recognized as individual crops for the purpose of production insurance.
- 3. The reduction in premium rates will be established using methodology recommended by an actuary and approved by Agriculture Agri-Food Canada and will be restricted to the attached tables applicable for 1997/98, and subsequent years.
- 4. The insured must select one coverage level and one unit price (i.e.: high; medium; low) for all crops insured under this plan.
