Net income, total (6)	15,781	11,007	4,050	47,207	-9,137	-20,629	5,098	39,365	61,915	59,458	65,358

Footnotes:

- 1 Data begin in 1926 for Canada and all provinces except Newfoundland and Labrador for which data begin in 1972.
- 4 From 1926 to 1970, realized net income is the sum of realized gross income less operating and depreciation charges.
- 5 From 1971 to date, realized net income plus value of inventory change equals total net income.
- 6 From 1926 to 1970, total net income equals total gross income less operating and depreciation charges.
- 7 From 1971 to date, total cash receipts minus operating expenses after rebates equals net cash income.
- 9 Payments to potato growers for losses sustained as a result of fusarium rot in the 1960 potato crop.

Footnotes

1 Data previous to 1971 see CANSIM table 002-0014.

3 Less than \$500 is reported as 0.

5 As of 1992, crop insurance payments no longer include payments under private hail insurance plans.

6 Generally, these are programs to deal with unusual climatic and/or economic conditions in the agriculture sector.

7 As of 2001, receipts from Wool, Pregnant mare's urine, Horses and Embryos are accounted for in Miscellaneous livestock and livestock products.

8 Prior to 2001, receipts from grapes and blueberries were included in Other berries and grapes. The categories Other berries and grapes and Strawberries, taken together, are equal to Total small fruits.

9 The category total small fruits comprises receipts from the sale of numerous small fruits. Blueberries, strawberries and grapes are the major sub-components of total small fruits. Cranberries were added to this table in 2007.

10 Includes mushroom receipts.

11 The category total tree fruits comprises receipts from the sale of numerous tree fruits. Apples is one of the components of total tree fruits.

14 Preliminary farm cash receipts estimates for potatoes are unreliable pending the availability of administrative data at the end of the crop year.

15 Source data for the value of greenhouse vegetables, on a crop year basis, are available in CANSIM table 001-0006.

16 Source data for the value of field vegetables, on a crop year basis, are available in CANSIM table 001-0013.

17 Source data for the value of fruits, on a crop year basis, are available in CANSIM table 001-0009.

Footnotes

1Data begin in 1926 for Canada and all provinces except Newfoundland and Labrador for which data begin in 1972.

2For data prior to 1971 see CANSIM table 002-0015.

3Starting in 1986, the following were combined: cash wages and room and board; repairs to buildings and repairs to fences; fertilizer and lime expense; fertilizer and lime rebates. Starting in 1990, legal and accounting fees were taken out of other expense. As of 1997, hatcheries and farms with only christmas trees became part of the agriculture sector. The inclusion of hatcheries has increased all expenses except poultry purchases.

4The total operating expenses after rebates includes all gross operating expenses minus rebates.

5Downward adjustments in the potato commercial seed percentage from 1997 to 2004 and again from 2005 to present have precipitated a break in the series. Hence comparisons with previous years are affected.

6 In December 2013, the 2012 interest and total operating expenses after rebates items by province and Canada were corrected. The 2012 data in this table were last revised in November 2014.

Footnotes:

The Farm Input Price Index (FIPI) estimates the change in price that farmers pay for inputs into their farming operation through time. A range of administrative price sources are used 1 to calculate this estimate.

For more information, or to enquire about the concepts, methods or data quality of this release, contact Statistics Canada's National Contact Centre (toll-free 1-800-263-1136; 613-951-2 infostats@statcan.gc.ca) or the Media Hotline (613-951-4636; mediahotline@statcan.gc.ca).

Footnotes:

- 3 A residual is arrived at by taking the number of animals leaving for farming operations outside that province minus the number of animals coming to farms within that province.
- 10 As of 2006, interprovincial import and export values of sheep and lambs are published as the total value instead of the net value.
- 11 As of 2006, total supply and total disposition of sheep and lambs are calculated using the total interprovincial import and export values instead of the net value.

Footnotes:

1 Farm surveys collect data from Quebec, Ontario, Manitoba, Saskatchewan and Alberta at all six survey occasions during the crop year (which extends from the December to the following November occasion). However, data are collected twice a year (in the June Farm survey on seeded areas and in the November Farm survey on final crop production) for Newfoundland and Labrador, Prince Edward Island, Nova Scotia, New Brunswick and British Columbia, which represent between 2% and 4% of national totals. As of July 2014 for the Atlantic provinces and British Columbia, July and September production estimates are calculated using the final estimates of the last three crop years. The harvested area is first

30 Totals may not equal the sum of their parts due to the use of conversion factors or rounding of fractions to whole numbers.
