

Table 26

Estimated areas, yield, production and average farm price of principal field crops, in metric units (Year-to-date (averages)), annual(1,31)

Prince Edward Island

Harvest disposition	Type of crop	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015
Seeded area (acres)	Corn for grain (2)	5,434	7,904
Seeded area (acres)	Corn, fodder	0	4,446	5,928	6,916	6,916	7,904	7,410	7,410	4,940	3,458	3,952
Harvested area (acres)	Corn for grain (2)	5,434	7,904
Harvested area (acres)	Corn, fodder	0	4,199	5,928	6,916	6,916	7,904	6,916	7,410	4,940	3,458	3,952
Average yield (tonnes per acre)	Corn for grain (2)	3.1	3.4
Average yield (tonnes per acre)	Corn, fodder	0	8.1	11.8	13.6	8.3	16.3	11.8	14.9	17.2	17.1	12.7
Production (metric tonnes)	Corn for grain (2)	16,900	27,200
Production (metric tonnes)	Corn, fodder	0	34,500	70,800	95,300	58,100	130,600	82,600	111,600	86,200	59,900	50,800

... Not applicable

Footnotes:

1 Farm surveys collect data from Quebec, Ontario, Manitoba, Saskatchewan and Alberta at all six survey occasions during the crop year (which extends from the December to the following November occasion). However, data are collected twice a year (in the June Farm survey on seeded areas and in the November Farm survey on final crop production) for Newfoundland and Labrador, Prince Edward Island, Nova Scotia, New Brunswick and British Columbia, which represent between 2% and 4% of national totals. As of July 2014 for the Atlantic provinces and British Columbia, July and September production estimates are calculated using the final estimates of the last three crop years. The harvested area is first estimated based on the ratio obtained from the sum of harvested areas of the last three years over the sum of the seeded areas of the last three years. This average ratio is applied to their current year's reported seeded acreage from the June survey. This estimated harvested area is then multiplied by the average yield of the last three years to estimate production.

2 For imperial data see CANSIM table 001-0017.

31 Totals may not equal the sum of their parts due to the use of conversion factors or rounding of fractions to whole numbers.
