- (ii) With respect to the minimum circle diameter requirement set out in column (e) of Table 1 and column (d) of Table 2, where applicable, the space encompassed by the circle shall be in a location on the lot which will accommodate an on-site sewerage system.

- (iii)** Lots shall be categorized according to the following:
- (1) Category I, where the lot has a depth or permeable natural soil of 2 ft./0.61 m or more, and where the depth of bedrock and the depth to the maximum water table elevation is greater than 4 ft./1.22 m;
 - (2) Category II, where the lot has a depth of permeable natural soil of 1 ft./0.3 m or more, but less than 2 ft./0.61 m, and where the depth to bedrock and the depth to the maximum water table elevation is 4 ft./1.22 m or greater;
 - (3) Category III, where the lot has a depth of permeable natural soil less than 1 ft./0.3 m and where the depth to bedrock and the depth to the maximum water table elevation is less than 4 ft./1.22 m.
- 4.** Except where such a lot is serviced by a central sewerage system, development of a Category III lot shall not be permitted unless it is upgraded, to the satisfaction of the Minister of Environmental Resources, to conform with Category II as described in clause 3(b).
