QUESTIONS

Reading

Read the selection below and answer the questions.

Polar bear survival in the wild may be in danger because of climate change. Climate change is lengthening the ice-free period in southwestern Hudson Bay and thus the polar bear fast. During the Arctic spring, the bears build up their fat by eating seals that they hunt from the ice. Warming temperatures are reducing the ice. For the estimated 2000 polar bears in the region, this has serious implications. The sea ice melts completely each summer, stranding the marine creatures on land and away from their normal diet of seal meat. Although many polar bears do consume lots of blueberries and black crowberries on land, the bears lose almost a kilogram of weight a day for at least four months and as long as eight months in the case of pregnant females. Canadian wildlife biologists have been trying for decades to determine whether polar bears can better endure their months of fasting on land by eating berries. Biologists in the past have tried using measurements from muscle and blood, without success. More recently, researchers applied masks to 300 tranquilized bears and gathered samples of their breath. They found no significant differences between bears that had recently eaten berries (detectable from tell-tale stains on teeth and backsides) and those that hadn't. Can a berry diet reduce the polar bears' dependence on their fat reserves? The answer is no. Unlike that of the brown bear, polar bear metabolism cannot extract sufficient energy from berries alone.

“Thanks for agreeing to talk with me about your successful business,” said Nat, shaking hands with Alex. 1

Alex smiled. “I’m happy to help students with career exploration.” 2

“I have three main questions: How did you get started? What do you like best about being your own boss? And what advice do you have for young entrepreneurs?” 3

“You are well prepared,” said Alex, nodding in approval. “I trained at Blaiseville College.” 4

“How did you go from there to having your own Hair Shop on Wheels?” 5

“I got the idea after volunteering at my grandfather’s seniors’ residence. I cut hair and trimmed beards, even styled women’s hair, for anyone who couldn’t get out to the barbershop or hairdresser. The residence didn’t have space to set up professional equipment, so I thought of a way to bring it all to them. After graduation, I borrowed money from the bank so I could at least afford to buy a van. My brother put in some sweat equity as a mechanic and converted the van into a mobile salon,” explained Alex. 6

Nat was puzzled. “Sweat equity? Your brother gets a share of your profit as payment for his hard work fixing up the van?” 7

Alex nodded in agreement. “That’s the best thing about being my own boss. I can be creative in how I run my business.” 8

“That aspect appeals to me too,” said Nat. “What’s your best advice for me as an aspiring businessman?” 9

“Do your research, develop a realistic business plan and focus on your goals.” 10

Multiple-Choice Questions

- 1** How does Nat show that he prepared for his interview with Alex?

An Animator from Scarborough

Over 1500 applications from around the world flood George Lucas's animation academy each year (Lucas created the Star Wars films), but only four applicants are selected for internships. Randolph Lizarda, 21, from Scarborough, was one of them.

"I'm very excited. I'll be working in the LucasArts division animating video games, although I don't know what we're working on. They wouldn't tell me—it's confidential," Lizarda said on a break from his Sheridan College class.

As a child, Lizarda liked to draw cartoons. Now he is learning to transfer his drawing ability to the computer.

"I was into [art] when I was little; then I got more into it in high school. In Grade 10, I took one of those career surveys to find out where you fit in. I fit into the animation industry," he said.

Lizarda aspires to one day work for an animation company such as Pixar or DreamWorks.

"He's an excellent student," said Dave Quesnelle, who teaches animation and is one of Lizarda's professors. Lizarda stood out after handing in his first assignment, a 10-second action sequence of a muscular circus performer balancing on a ball before jumping through a hoop of fire. This clip was the first segment on the demo reel he submitted to Lucasfilm.

"I had a really good sense of his storytelling. He had the basic principles of animation [but] it was also comical. And that's our job. Anyone can make a picture move, but to make it entertaining, that's the craft of an animator."
