

Classification of Industries & Assessment Rates

2011

This booklet/publication is intended for information purposes only. In accordance with Board policy, employer classifications may change throughout the year. We make our best efforts to ensure the accuracy of this publication at the date of printing. Please refer to our website at www.wcb.pe.ca for the most current version of 2011 Classification of Industries and Assessment Rates.

How to use this book

Inside this book you will find the 2011 assessment rates for every \$100 of gross payroll.

To find the rate that may apply to your business, please refer to the index of industries.

Assessment rates

Employers are classified into industries (SIC) based on their primary business activity. Industries are then divided into Industry Groups based on similarity of activity. Industry Groups are assigned to a rate group with their class/sector based on their historical injury cost experience.

Industry groups within the same rate group will pay the same assessment rate. The assessment rate is based on the cost of claims for the entire group. In this way, employers collectively share the costs of claims within their rate group.

Some employers participate in the Board's Experience Rating Program and their rate may differ from those indicated in this booklet.

SIC Codes

Listed beside your industry is a SIC code (Standard Industrial Classification Code). These codes are used by Statistics Canada as well as Workers Compensation Boards. It is helpful to know your SIC code when you are contacting the WCB.

Questions?

For more information, please read the Information for Employers booklet. If you still have questions, contact the Employer Services Department of the Workers Compensation Board at 1-902-368-5680 or toll free 1-800-237-5049 (Atlantic Canada) or visit our website at www.wcb.pe.ca

2011 Maximum Assessable Earnings Level is \$47,800
